

High Bay Lights are great for general purpose, energy efficient, indoor lighting. Linear Fluorescent High Bay Fixtures, Induction High Bay Fixtures, HID High Bay Fixtures for every purpose. Choose what suits your organization or call an Warehouse-Lighting.com for help with layout and High Bay Light Selection.

HID High Bay

(Hid) High Intensity Discharge High Bay Fixtures including the newest technology Pulse Start Metal Halide, and older Technology of High Pressure Sodium (HPS) and Metal Halide (MH) have been the lighting warehouses, manufacturing, garages, hangers, barns and other commercial, retail and industrial locations. Today with the newer Pulse Start Metal Halide the lighting has become even more energy efficient and has greater lamp life (i.e. a 320 Pulse Start Metal Halide has the equivalent light output of a 400 watt Metal Halide but uses 80 less watts). In environments where dirt is substantial, or corrosive these High Intensity Discharge Fixtures are ideal. While Linear Fluorescent High Bays are gaining market share in areas, it is unlikely to replace MH in locations.

- High Pressure Sodium or Pulse Start Metal Halide
- Offered with an Aluminum or Acrylic reflector (15% Uplight)
- 100-1000w HPS or PSMH
- Most of our Fixtures us Major US Brand Ballasts and Lamps
- Open Rated Bulb and Socket on all Metal Halide

Fluorescent High Bay

Fluorescent High Bay Fixtures such as T5HO High Bay Lights and T8 High Bay Lights provide high Lumens per Watt (LPW) T5HO Lamp Output is around 5000 Lumens per lamp position (i.e. 6 lamp T5HO High Bay Fixture outputs 30,000 Lumens) T8 with a High Ballast Factor Outputs around 3000 Lumen per lamp position (i.e. 6 lamp T8 High Bay Fixture Outputs a total of 18,000 Lumens) These T8 and T5HO lights are a great alternative to Metal Halide and High Pressure sodium Lights using dramatically less watt and give you a clearer more vibrant light level. Many Utilities and the federal government are offering rebates to retro fit building to this much more effective technology. You can find some of this rebate information at Disireusa.org. The primary benefits of T5HO High Bay Fluorescent Fixtures and T8 High Bay Fluorescent Fixtures include energy savings, high color rendering (CRI), superior system efficacy, 93% lumen maintenance, long lamp life, instant on and instant re-strike, and better uniform lumen distribution at the floor or work space. We offer:

- 2, 4, 5, 6, 8, 10, 12 Lamp T8's
- 2, 4, 5, 6, 8, 10, 12 Lamp T5HO's
- Energy Efficient & High CRI
- Can be used with Motion Sensors (T8 should be supplied with a Program Start

Ballast when supplied with Motion Sensor to prolong the life of your lamps) (T5HO is always a Program Start Ballast)

- Instant on & Instant Restrike
